

## Virtual Billing Support (VBS)

**In these challenging economic times, can you really afford to be losing money due to a poorly producing biller or billing team?**

**Billing and collections** are the life source of your agency. With everything else they have to do besides billing, most billers don't have the time to be as thorough as needed. Most billers have not been trained enough and have nowhere to turn for questions and concerns in regards to claims issues. Without an efficient biller or billing team, your collections decline and your hard work goes to waste.

Most agency owners/administrators/managers have never been taught any meaningful methods with which they can analyze just how well their billing department is doing. Do you really have time for this? Let PMB provide you with the analyzation needed for your billing department.

PMB can remotely log in to your billing software and clearinghouse to make sure you are receiving maximum reimbursement! Let PMB give you the support you do not have the time or the expertise for. Based on the size of your agency and your monthly revenue, you decide which level will work best for you! We have three levels to choose from and you decide which payer source(s) you need assistance with. For a small monthly retainer, PMB will be available to your billing staff a few hours a month (depending on the package selected) to answer questions and help them solve billing problems that are preventing claims from being paid.

Our pricing structure for VBS is less than the reimbursement cost of a claim. So even if we save one claim from becoming lost or slow pay, you will be getting your money's worth. How can you say no to this type of support? For payment options, please see the back of this flyer.

## Emergency Billing Support (EBS)

EBS is designed for those unforeseen times that you are without a biller and need the expertise of PMB to ensure your claims continue to be processed in a timely manner. PMB will continue your Revenue Cycle Management process on a monthly basis for a short term. In just two weeks we can start working to help make sure you are able to meet your financial obligations. An annual contract is not required for this service- you decide how long you would like us to help.
